

BOPET Metallized Films

One Side Metallized Other side Non Heat Sealable Plain Film

Salient Properties

1. Uniform thickness across the width
2. Uniform Optical Density
3. Excellent lamination quality
4. Excellent machinability

Film Structure

Varieties	Code	Optical Density *	Thickness	Application
Metallized on Plain side	EMZP	2.2	15, 18, 20, 25, 30, 35, 40	Metallized for lamination with printed or un-printed paper, film, foil and board
Metalized on Corona Treated Side	EMZT	2.6	18, 20, 25, 30, 35	
Metallized Yarn Grade	EMZY	2.2	18, 20, 25	Metallized suitable for Yarn grade
Metallized Twist Wrap Grade	EMZT	2.2	15, 18, 20, 22	Metallized suitable for twist wrap application

* Other optical densities are available on request

** As per ASTM standards

*** Values mentioned are indicative

Used as one of the substrate in laminates or single layer for packaging of Bakery products, Biscuits, confectionary, ice cream, vegetables, snack foods, chips, dried foods and miscellaneous food and non food items requiring increased moisture and gas barrier properties.
