

Metalized Paper

Salient Properties

1. Uniform thickness across the width
2. Uniform Optical Density
3. Excellent lamination quality
4. Excellent machinability

Substrate Structure

Varieties	Code	Thickness	Application
Direct Metallized Paper	PDMZ	70-130 gsm	Paper Metallized
Transfer Metallized Paper Crom Paper	PTMZ	70-130 gsm	
Metalized Cast Coated Paper	PMZCP	80 gsm	
Metalized Kraft Paper	PMZKP	296 gsm	
Metalized Super Calendered Paper	PMZCL	50 – 75 gsm	
Metalised High Barrier High Heat Seal Coated Paper	PMZHBHS	60-120 gsm	

* Other metallized substrates are available on request

*** Values mentioned are indicative

Used as one of the substrate in laminates or single layer for packaging of Bakery products, Biscuits, confectionary, ice-cream, vegetables, snack foods, chips, dried foods and miscellaneous food and non food items requiring increased moisture and gas barrier properties.
